

AURASTACK – BFSI WORKFLOW LIBRARY (FINAL)

1. BANKING (Retail / NBFC / Cards)

1.1 Loan Origination (End-to-End)

- Application Intake Agent
 - KYC & Identity Agent
 - Bureau Fetch Agent
 - Financial Data Agent
 - Risk Decision Agent
 - Offer Generation Agent
 - Disbursal Agent
-

1.2 Credit Underwriting

- Case Aggregation Agent
- Document Consistency Agent
- Risk Flagging Agent
- Underwriter Assist Agent
- Decision Agent

1.3 Loan Collections

- Delinquency Detection Agent
- Segmentation Agent
- Strategy Agent
- Outreach Agent
- Negotiation Agent
- Resolution Agent

1.4 Payments (UPI / IMPS / NEFT)

- Authorization Agent
- Fraud Detection Agent
- Routing Agent
- Execution Agent
- Reconciliation Agent

1.5 Customer Servicing

- Intent Detection Agent
- Context Fetch Agent
- Validation Agent
- Action Agent

- Resolution Agent
-

1.6 AML Transaction Monitoring

- Transaction Monitoring Agent
 - Pattern Detection Agent
 - Risk Scoring Agent
 - Alert Generation Agent
 - Case Investigation Agent
 - Regulatory Filing Agent
-

1.7 Digital Account Opening

- Application Intake Agent
 - KYC Verification Agent
 - Document Validation Agent
 - Risk & Compliance Agent
 - Account Creation Agent
-

1.8 Cheque & Trade Document Processing

- Document Intake Agent
- Classification Agent

- Extraction Agent
 - Validation Agent
 - Exception Handling Agent
 - Processing Agent
-

1.9 Compliance & Regulatory Reporting

- Data Aggregation Agent
 - Validation Agent
 - Report Generation Agent
 - Submission Agent
-
-

2. INSURANCE – HEALTH

2.1 Cashless Claims

- Pre-Auth Intake Agent
- Policy Validation Agent
- Medical Validation Agent
- Fraud Detection Agent
- Approval Agent

- Hospital Coordination Agent
 - Settlement Agent
-

2.2 Reimbursement Claims

- Document Intake Agent
 - Validation Agent
 - Assessment Agent
 - Decision Agent
 - Settlement Agent
-

2.3 Pre-Auth Automation

- Pre-Auth Intake Agent
 - Policy Check Agent
 - Medical Rule Engine Agent
 - Approval Agent
 - Hospital Notification Agent
-

2.4 TPA Coordination & Settlement

- TPA Case Intake Agent
- Document Exchange Agent

- Validation Agent
 - Discrepancy Resolution Agent
 - Settlement Agent
-

2.5 Policy Issuance

- Proposal Intake Agent
 - KYC Agent
 - Medical Underwriting Agent
 - Risk Evaluation Agent
 - Policy Generation Agent
-

2.6 Medical Underwriting

- Medical Document Intake Agent
 - Medical Risk Analysis Agent
 - Underwriter Assist Agent
 - Decision Agent
-

2.7 Member Servicing

- Intent Detection Agent
- Policy Context Agent

- Validation Agent
 - Action Agent
 - Resolution Agent
-

2.8 Fraud & SIU

- Case Intake Agent
 - Pattern Detection Agent
 - Cross-Claim Analysis Agent
 - Investigation Assist Agent
 - Decision Agent
-

2.9 Appeals & Grievances

- Case Intake Agent
 - History Aggregation Agent
 - Review Agent
 - Resolution Agent
-
-

3. INSURANCE – MOTOR

3.1 Motor Claims (FNOL → Settlement)

- FNOL Intake Agent
- Policy Validation Agent
- Damage Assessment Agent
- Garage Coordination Agent
- Fraud Detection Agent
- Approval Agent
- Settlement Agent

3.2 Surveyor Assignment & Tracking

- Survey Request Agent
- Surveyor Assignment Agent
- Schedule Coordination Agent
- Report Collection Agent
- Status Tracking Agent

3.3 Salvage & Recovery Workflow

- Salvage Identification Agent
- Vendor Assignment Agent
- Auction / Disposal Agent

- Recovery Tracking Agent
 - Closure Agent
-

3.4 Policy Issuance (Motor)

- Vehicle Data Agent
 - Risk Pricing Agent
 - Policy Generation Agent
-

3.5 Renewals

- Renewal Reminder Agent
 - Risk Re-evaluation Agent
 - Offer Agent
 - Payment Agent
-
-

4. INSURANCE – PROPERTY & CASUALTY

4.1 Property Claims

- Claim Intake Agent
 - Policy Validation Agent
 - Surveyor Assignment Agent
 - Assessment Agent
 - Fraud Detection Agent
 - Decision Agent
 - Settlement Agent
-

4.2 Commercial Liability Claims

- Incident Intake Agent
 - Liability Evaluation Agent
 - Legal Coordination Agent
 - Settlement Agent
-

4.3 Commercial Underwriting

- Proposal Intake Agent
 - Risk Data Aggregation Agent
 - Site Analysis Agent
 - Underwriter Assist Agent
 - Decision Agent
-

4.4 Policy Issuance (Commercial)

- Coverage Structuring Agent
 - Pricing Agent
 - Policy Generation Agent
-

4.5 Renewals & Endorsements

- Renewal Agent
 - Risk Update Agent
 - Policy Update Agent
-
-

5. CROSS-INDUSTRY WORKFLOWS

5.1 Document Lifecycle Processing

- Document Intake Agent
- Classification Agent
- Extraction Agent
- Validation Agent
- Exception Handling Agent

- Routing Agent

5.2 Regulatory Reporting (RBI / SEBI / IRDAI)

- Data Aggregation Agent
- Validation Agent
- Report Generation Agent
- Submission Agent

5.3 Agent Performance & SLA Monitoring

- Activity Tracking Agent
- KPI Measurement Agent
- SLA Breach Detection Agent
- Performance Reporting Agent

AURASTACK – BFSI ANALYTICS DASHBOARD (BY WORKFLOW)

1. BANKING DASHBOARDS

1.1 Loan Origination Dashboard

Total Applications (daily / weekly / monthly)

Application Conversion Rate (%)

Approval / Rejection / Refer Split

Average TAT (application → decision)

Drop-offs by Stage (KYC, docs, underwriting)

Avg Loan Size & Ticket Mix

FOIR / Risk Distribution

Channel-wise Performance (branch / digital / partner)

1.2 Credit Underwriting Dashboard

Cases Processed per Underwriter / Agent

Avg Decision Time per Case

Auto vs Manual Decision Ratio

Risk Band Distribution

Exception / Override Rate

Document Mismatch Frequency

Approval Rate by Segment

1.3 Loan Collections Dashboard

Total Delinquent Accounts (DPD buckets)

Collection Efficiency (%)

Recovery Rate by Bucket

Promise-to-Pay vs Actual Conversion

Channel Effectiveness (call / WhatsApp / field)

Resolution Time per Case

Write-off Rate

Agent Productivity (cases handled vs recovered)

1.4 Payments Dashboard

Total Transactions Volume & Value

Success vs Failure Rate

Failure Reason Distribution

Cost per Case

Here's the guideline to create mock data across all your workflows:

****Ground rules before you build****

Make the numbers look real, not perfect. Real BFSI data has inefficiencies — a 78% STP rate, not 95%. A 3.2 day TAT, not exactly 3. Messy numbers build credibility in a meeting. Clean round numbers look fabricated immediately.

****Banking mock data ranges****

Loan Origination — 800 to 1,200 applications per day. Conversion rate 34 to 42%.
Auto-approval 55 to 65%, manual review 28 to 35%, reject 8 to 12%. Average TAT 4.2 hours down from 5 days baseline. Drop-off highest at document submission stage — show 22 to 28% drop there.

AML Monitoring — 180,000 to 220,000 transactions monitored daily. Alert rate 0.8 to 1.2%.
False positive rate 68 to 72% (this is intentionally high — it's a known industry pain point, makes Aurastack's improvement story credible). STRs filed 12 to 18 per week.

Collections — DPD 0-30 at 58%, DPD 31-60 at 24%, DPD 61-90 at 11%, 90+ at 7%. Collection efficiency 67%. Promise-to-pay conversion 44%. WhatsApp outreach outperforming calls by 2.3x — show this gap visually.

KYC — Average onboarding time 18 minutes down from 3 days. Document failure rate 14%.
Video KYC completion rate 81%.

****Insurance Health mock data ranges****

Cashless Claims — 2,400 to 2,800 pre-auth requests per day. Approval rate 71%. Average approval TAT 47 minutes down from 6 hours. Fraud flag rate 3.2%. Settlement TAT 2.1 days.

TPA Coordination — Average back-and-forth iterations per case 4.7 before Aurastack, 1.2 after. Discrepancy rate 18%. Show this before vs after — it's your strongest number here.

Reimbursement — Document deficiency rate 31% (high on purpose — common problem). Average processing time 4.8 days. Cost per claim processed ₹340.

****Insurance Motor mock data ranges****

FNOL to Settlement — 640 to 780 FNOLs per day. Average settlement time 6.2 days down from 14 days. Fraud detection rate 4.1%. Garage coordination time 38 minutes average.

Surveyor Assignment — Average assignment time 23 minutes. Survey completion TAT 1.4 days. Pending surveys never go above 8% of open cases — keeps it looking operationally tight.

Salvage & Recovery — Recovery value at 73% of estimated value. Auction success rate 81%. Average recovery time 11 days.

****Cross-workflow mock data ranges****

Document Processing — 14,000 to 18,000 documents per day. STP rate 82%. Extraction accuracy 99.1% (use this exact number — it's from your website and should be consistent). Exception rate 11%. Cost per document ₹12 down from ₹68 manual baseline.

Agent Performance — Average cases per agent per day 47. SLA breach rate 6.2%. Queue backlog under 3% of daily volume. Cost per case ₹28.

****How to show before vs after****

Every dashboard needs a baseline column — what the process looked like before Aurastack. This is your ROI story built into the data itself. Use these as your baseline multipliers: TAT 6 to 10x slower, cost per transaction 4 to 5x higher, manual intervention rate 3x higher, error rate 2x higher.

****Consistency rules across all dashboards****

Use the same date range everywhere — last 30 days as default with a toggle for 7 days and 90 days. Same currency — INR for India mock data. Volume numbers should mathematically add up — if you show 1,000 applications, your approval plus rejection plus referral should equal 1,000. Nothing kills credibility in a meeting faster than numbers that don't reconcile.

All of this must reflect in the operation inbox and cases as well..
